One part of achieving this broad goal is to implement a new way of defining and assessing pharmacy practice skills, such as entrustable professional activities (EPA). Assessment of professional tasks and practice activities with EPAs has been successfully implemented in medical education for assessing trainee preparation for practice.

Entrustable Professional Activities for Pharmacy Practice
The AGS, ADGAP, and a workgroup of geriatricians collaborated to develop curricular milestones (used to determine what skills every graduating geriatric fellow should be able to demonstrate when practicing effectively and safely in all care settings) and End-of-Training Entrustable Professional Activities (or EPAs, which describe the core work of a discipline’s specific expertise).

Training Requirements | ADGAP - Association of Directors ...
The Core Entrustable Professional Activities (EPAs) for Entering Residency New section The AAMC published new guidelines in May 2014 to provide expectations for both learners and teachers that include 13 activities that all medical students should be able to perform upon entering residency, regardless of their future career specialty.

The Core Entrustable Professional Activities (EPAs) for ...
Assessment of individual competencies through milestones can be challenging. While competencies describe characteristics of the person, the entrustable professional activities (EPAs) concept refers to work-related activities. EPAs would not replace the milestones but would be linked to them, integrating these frameworks.

Integration of Entrustable Professional Activities with ...

Entrustable professional activities (EPAs) represent a workplace-based method to assess the achievement of competency milestones at the point-of-care that can be applied to anesthesiology training in the United States.

Development and Pilot Testing of Entrustable Professional ...
Choose those milestones that will help faculty assess for competence in a trainee and make a decision regarding entrustment for the chosen activity. While there are not necessarily right or wrong milestones, it remains important to make decisions based upon the knowledge, skills, and attitudes required of physicians to meet the outcomes expected of the future health care system.
Milestones, EPAs, and NAS - AAIM
Milestones and EPAs. In the past decade, pediatric educators and researchers, with support and leadership from the American Board of Pediatrics (ABP), have developed and evaluated the integration of frameworks for assessing trainee readiness to practice medicine without supervision. These frameworks — core competencies along with their milestones and entrustable professional activities (EPAs) — complement each other and fill the assessment gaps that result when either is used alone.

Milestones and EPAs | The American Board of Pediatrics
The development of core entrustable professional activities (EPA) for entering residency and Accreditation Council for Graduate Medical Education’s milestones have spurred thinking about the fourth year of medical school as a transition to residency. In this monograph, we lay out our specialty focused post-clerkship curriculum and report learner and residency director perceptions over the ...
